Intellectual Property, Ethical Innovation and Sustainability

*Towards a New Social Contract
for the Digital Economy?*

LUISS 

University - Rome

PROGRAM

WELCOME LETTER

Dear Colleagues and Friends,

It is with great pleasure that I welcome you to the 42nd Congress at Luiss University in the historic and enchanting city of Rome. Following the success of last year's congress at the University of Tokyo, I am excited for us to reconvene in person for this important gathering.

Our theme for this year centers on the role of intellectual property laws and their enforcement in promoting ethical and sustainable innovation. Given the rising concerns for environmental stewardship, and respect for fundamental human values (including dignity, free expression, privacy, and diversity), there is an urgent need for a holistic re-evaluation of the impact of intellectual property laws on the pursuit of the mentioned values. The pivotal importance of this line of research for the evolution of IP laws is confirmed by the record number of quality submissions we have received this year and that are reflected in the program.

Our esteemed speakers will address the dynamic framework of the digital economy, highlighting the emerging regulations surrounding artificial intelligence-driven innovation. While this field is still evolving, they will also scrutinize more traditional areas of creativity and innovation to assess whether the foundational social contract of IP protection remains relevant amidst principles of ethical innovation and sustainability.

I look very much forward to four days of insightful discussions, pleasant social gatherings, and future collaborations that will contribute to the progress of teaching and research in intellectual property.

Again, welcome to Rome!

Sincerely,

Christophe Geiger, ATRIP President
